EDUCATION

SVKM's SBMP Polytechnic College

Diploma in Computer Science

India

2023 – Present

TECHNICAL SKILLS

Languages: Python, C#, SQL, TypeScript, Kotlin | **Frameworks/Tools:** .NET, Visual Studio, Streamlit, React, Vite, FastAPI, Tailwind CSS, Android Studio

Databases: MSSQL, SQLite | **Systems:** Linux, Docker, WSL, Networking | **AI & Blockchain:** LLM APIs, Speech-to-Text, Smart Contracts (Algorand, Solana)

EXPERIENCE

DeepCytes Cyber Labs

Cyber Analyst

Remote

May 2026 – Jun 2026

– Performed cybersecurity analysis, threat assessment, and cyber intelligence research within a professional lab environment.

Balar Fabrics Pvt. Ltd.

Software Development and Deployment Intern

Hybrid

Jan 2026 – Present

- Implemented bulk ERP data migration from Excel (Pandas/openpyxl) and interactive Plotly dashboards with CSV export.
- Engineered a SQL Server-to-cloud sync engine (pyodbc, FastAPI) with a financial outstanding-reconciliation module replicating legacy accounting logic via FIFO allocation.
- Built an interactive fabric shortage-calculation dashboard (Streamlit) with PDF report export via ReportLab.
- Developed a responsive multi-page textile catalog web portal with dynamic gallery rendering and scroll-triggered animations.

Balar Fabrics Pvt. Ltd.

Software Development Intern

On-site

Nov 2024 – Jan 2025

- Designed and deployed a production barcode inventory system (C#, .NET, MSSQL) with local network/IP-based deployment.
- Built a full-stack Streamlit inventory system with barcode scanning, SQLite backend, and TSPL thermal printer integration.

Spectrum'25 College Techfest

Technical Team Member

College Campus

2024

- Built and maintained the techfest website (React, Node.js) and provided on-ground technical support.

PROJECTS

- **PayOps AI** (Python, FastAPI, Gemini API, Redis, Kafka, Docker) — Autonomous agentic AI system that detects and remediates UPI/card payment gateway failures in real time; cut MTTD from 15 min to under 30 sec.
- **BlockEstate** (Python, Algorand (AlgoKit, PyTeal), Flutter Web) — Full-stack real estate tokenization platform fractionalizing properties into Algorand ASAs with atomic escrow trading and KYC-gated clawback transfers.
- **QB Answers AI** (React, TypeScript, Gemini API, Dexie.js) — Privacy-focused app matching exam questions to lecture material via Gemini 2.0 Flash, with in-browser PDF/DOCX/PPTX parsing and quiz/flashcard modes.
- **Ai Virtual Tryon** (TypeScript, React, Next.js) — Generative AI garment try-on platform with multi-stage workflow, client-side image processing, OTP auth, and a token usage/cost-analysis dashboard.
- **AI Knowledge Archive & MCP Memory Server** (Python, MCP, Groq (LLaMA-3.3 70B)) — Async MCP server giving AI assistants persistent cross-platform memory via SQLite indexing and semantic re-ranking.
- **Autogit Tool** (TypeScript) — Developer CLI that scans repos, auto-generates docs via LLMs, and automates Git commits, staging, and releases.
- **Smart File Categorizer & Desktop Organizer** (Python, Tkinter) — Desktop automation tool auto-organizing files using heuristics for 30+ recognized project structures.
- **Barcode Inventory System (Python)** (Python, Streamlit, SQLite, Plotly) — Real-time barcode scanning inventory system with a 6-table normalized schema and TSPL thermal-printer label generation.
- **Barcode Inventory System (C#)** (C#, .NET, MSSQL) — Production-deployed barcode-based stock and material tracking system with local network integration.
- **Finsakhi** (Python, React, Vite, FastAPI) — Hackathon financial-education platform with lessons, assessments, podcasts, and an AI chatbot.
- **HealthBridge** (Python, React, Vite, Tailwind CSS) — Health management platform for blood report analysis, health tracking, meal planning, and AI chat support.
- **Hides** (Python, FastAPI, JavaScript) — Secure file storage application with modular authentication, cryptography, and email services.
- **StudyFlow** (React, TypeScript, Vite) — Project and document management app with PDF export and API-key-based user settings.
- **Secure Messaging (Matrix)** (Linux, Matrix Server) — Self-hosted, end-to-end encrypted messaging server deployment.

PROJECTS IN PROGRESS

- **SMS Forwarder Pro** (Kotlin, Android Studio) — Privacy-first foreground-service Android app forwarding banking OTPs via SMS, Email, and Telegram with no third-party servers.
- **Jarvis** (Python, Whisper, Gemini API) — Speech-to-speech AI assistant with conversational memory and natural voice responses.
- **Community Stablecoin System** (Solana, Algorand) — Community-focused stablecoin built with smart contracts across two chains.
- **Industrial Print & Color Separation Automation Suite** (Python, OpenCV, NumPy, Cloudflare Workers AI) — Computer-vision prepress pipeline for automated color separation, motif detection, ink-coverage analysis, and native PSD generation, targeting 90%+ labor reduction.
